

- Go Solar/Renewable Energy
- Research hybrid/electric cars
- Install central air purification
- Consider solar pool heating
- Get an air quality audit
- Go for bamboo (flooring, cutting boards, towels and sheets)
- Install low flow showerheads
- Install Energy Star-qualified double pane windows for better insulation
- Avoid letting faucets run
- B.Y.O.B. (of water)
- Avoid property pesticide use
- Seal, caulk, and insulate your house
- Install a ceiling fan
- Conserve energy by turning off all power strips not in use
- Avoid charging electronics overnight
- Purchase eco-sensitive accessories
- Buy low VOC paint
- Install dimmers or motion sensors on your lights, inside and out
- Collect rainwater for landscaping
- Use rechargeable batteries
- Buy things that will last
- Choose reusable instead of disposable
- Install timer and sensor light switches - turn off the lights automatically
- Consider solar lights, radios, and a solar-powered oven or water heater
- Protect natural resources
- Install low-flow toilets, shower heads, and under-sink flow restrictors
- Prowl architectural salvage lots for fun finds

- Buy Energy Efficient appliances
- Install Central Water Purification
- Get an Energy Audit
- Install Compact Fluorescent Light Bulbs
- Support recycling
- Clean the refrigerator coils for greater efficiency
- Take shorter showers
- Turn off the lights when you leave a room; unplug your electronics not in use
- Avoid “standby” mode when using computers and computer peripherals
- Drive under 60 mph
- Invest in environmental mutual funds
- Go toxin free at home
- Opt for Energy Star quality laptop
- Purify indoor air with plants instead of artificial room air fresheners
- Carpool
- Upgrade your toilet to a low flush model
- Start composting
- Buy products made from recycled materials
- Use greener cleaners
- Turn off your dishwasher drying cycle
- Repair leaky faucets
- Buy organic food
- Install Energy Saving Dryer Vent Closure Systems
- Install Water Filters – End Plastic Water Bottle Waste!
- Use alternative building materials
- Consider upgrading your heating and cooling system
- Install a carbon monoxide detector
- Buy boxed food items items in recycled packaging
